# 《香格里拉百年回望》

## 内容概要

China is changing fast. Seemingly overnight it has become an economic and political powerhouse on a global scale. Although it is the recent rise of China that makes the daily news, the last century saw other large and rapid changes: the fall of the last imperial dynasty, the failure of the Nationalist government, and the ascent of Mao Zedong and the new China. How have these changes affected the land and people of China? Can lessons from the past give us insights about the future? For six years, Robert Moseley lived and worked as a conservation scientist in the mountains of northwest Yunnan Province. As part of that work, he set out to answer these questions and apply the results to the conservation of nature and culture.

Northwest Yunnan provides a compelling backdrop to explore these issues, with its spectacular mountain environment and diverse ethnic cultures that were once remote, but are now confronted with unprecedented rates of change. Following in the footsteps of early twentieth century explorer-photographers, Moseley and colleagues traveled extensively through this region rephotographing original scenes and comparing them with modern conditions. In *Revisiting Shangri-La*, he uses this collection of repeated photographs as a powerful visual tool to portray the dynamic and resilient character of people and the land and to communicate future opportunities for conservation.

## 作者简介

作者:(美)木保山(Bobert K. Moseley)

# 《香格里拉百年回望》

## 书籍目录

Foreword by Professor Ma Keping  
Prologue: Whence Shangri-La  
Part 1 Introduction  
Repeat Photography: Finding the Perfect Match  
The Place: Subtropical Forests and Alpine Splendor  
The People: Communities of Diverse Cultures  
Conservation: A Wealth of Natural Resources  
Western Explorers: Missionaries and Plant Collectors.  
Part 2: The Photographic Record  
Yunnan Tea and Horse Road  
Mountain Villages  
Towns and Cities  
Sacred and Religious Sites  
Three Great Rivers  
High Mountains  
Forests  
Impacts of Climate Change  
Epilogue: The Future of Shangri-La  
Acknowledgements  
Select Bibliography  
Photo and Map Credits  
Index

## 编辑推荐

The causes of landscape and environmental change in China during the past century are enduring questions. There is much speculation, but little direct evidence. But repeat photography does more than just document changes on the land. It also documents change in people during the past century and how cultural changes can influence the patterns of environmental change. This is especially important in the mountains of Yunnan and elsewhere in western China, which today experience unprecedented development pressures. Many people are aware of the great changes that have taken place in eastern China during the past several decades. Western China is poised to see a similar transformation. Understanding the human-nature interrelationships of the past can help ensure that we manage these resources to maintain the biological integrity of the land and provide benefits to all people of China.

## 精彩短评

- 1、其实是冲着看洛克当年的照片买的书。70年间不变的只有那些山河
- 2、主要是香格里拉一些老照片和后来近似机位拍摄的新照片的对比。有点像国家地理那本什么百年追寻。不过那本死贵，居然还卖没了。这本的形式和那个差不多。可以作为对比资料了解一下。照片的艺术性一般。可能史料价值比较大？
