### 内容概要

Constant technological advances and the current focus on ecological considerations have had a strong impact on the construction of office buildings as well as the interior design of work spaces. Further decisive aspects beyond purely functional considerations of work organization are corporate identity, the creation of a positive and motivating working environment and very often also representative functions. Masterpieces: Office Architecture + Design, another volume of the new series Masterpieces presents 60 outstanding projects from all over the world. The reader will find carefully selected works from international established architectural firms as well as promising newcomers, documenting today's different developments regarding the construction and design of offices.
