

《Typed Lambda Calculi》

图书基本信息

书名：《Typed Lambda Calculi and Applications(有类型Lambda演算及其应用/会议录)》

13位ISBN编号：9783540255932

10位ISBN编号：3540255931

出版社：Springer Verlag

作者：Urzyczyn, Pawel (EDT)

页数：432

版权说明：本站所提供下载的PDF图书仅提供预览和简介以及在线试读，请支持正版图书。

《Typed Lambda Calculi》

内容概要

The LNCS series reports state-of-the-art results in computer science research , development , and education , at a high level and in both printed and electronic form. Enjoying tight cooperation with the R&D community , with numerous individuals , as well as with prestigious organizations and societies , LNCS has grown into the most comprehensive computer science research forum available. The scope of LNCS , including its subseries LNAI , spans the whole range of computer science and information technology including interdisciplinary topics in a variety of application fields. The type of material published traditionally includes. —proceedings (published in time for the respective conference) —post-proceedings (consisting of thoroughly revised final full papers) —research monographs (which may be based on outstanding PhD work , research projects , technical reports , etc.) .

《Typed Lambda Calculi》

书籍目录

Completeness Theorems and A-Calculus
A Tutorial Example of the Semantic Approach to Foundational Proof-Carrying Code: Abstract Can Proofs Be Animated by Games?
Contributed Papers
Untyped Algorithmic Equality for Martin-Löf's Logical Framework with Surjective Pairs
The Monadic Second Order Theory of Trees Given by Arbitrary Level-Two Recursion Schemes Is Decidable
A Feasible Algorithm for Typing in Elementary Affine Logic
Practical Inference for Type-Based Termination in a Polymorphic Setting
Relational Reasoning in a Nominal Semantics for Storage
Filters on CoInductive Streams, an Application to Eratosthenes' Sieve
Recursive Functions with Higher Order Domains
Elementary Affine Logic and the Call-by-Value Lambda Calculus
Rank-2 Intersection and Polymorphic Recursion
A λ -Calculus
Subtyping Recursive Types Modulo Associative Commutative Products
Galois Embedding from Polymorphic Types into Existential Types
On the Degeneracy of Z-Types in Presence of Computational Classical Logic
Semantic Cut Elimination in the Intuitionistic Sequent Calculus
The Elimination of Nesting in SPCF
Naming Proofs in Classical Propositional Logic
Reducibility and TT-Lifting for Computation Types
Privacy in Data Mining Using Formal Methods
L3: A Linear Language with Locations
Binding Signatures for Generic Contexts
Proof Contexts with Late Binding
The V-Calculus. Functional Programming with Higher-Order Encodings
A Lambda Calculus for Quantum Computation with Classical Control
Continuity and Discontinuity in Lambda Calculus
Author Index
