

《Integer Programming》

图书基本信息

书名：《Integer Programming and Combinatorial Optimization 自动时间表生成的实践与理论III》

13位ISBN编号：9783540422259

10位ISBN编号：3540422250

出版时间：2001-6

出版社：1 edition (2001年6月1日)

作者：Karen Aardal

页数：421

内容概要

在线阅读本书

This book constitutes the reviewed proceedings of the 8th International Conference on Integer Programming and Combinatorial Optimization, IPCO 2001, held in Utrecht, The Netherlands in June 2001. The 32 revised full papers presented were carefully reviewed and selected from a total of 108 submissions. The proceedings reflect most current directions in integer programming and optimization research. Among the topics covered are approximation algorithms, branch and bound algorithms, computational biology, computational complexity, algorithmic geometry, cutting plane algorithms, diophantine equations, geometry of members, graph and network algorithms, online algorithms, polyhedral combinatorics, scheduling theory and algorithms, and semidefinite programs.
