《英语教学中的学术研究与写作》

内容概要

The authors of this book first introduced briefly and systematically the research methods and traditions , and then exemplified with their own writings and research works how to apply the research methods to teaching practice , which may serve as some help for non-researchers to develop skills to practice academic research in their working place by themselves , to read and evaluate research reports of others with critical and analytical eyes.and to write academic works or papers based on their research work in the teaching surroundings.
