《埃及肺及胸膜肿瘤患者的血清V》

内容概要

The book is an attempt to clarify the clinical significance of human vascular endothelial growth factor and human Hepatocyte growth factor, and their combined use with Tissue polypeptide antigen and Neuron specific-enolase, in the early and differential diagnosis between lung cancer subtypes.

《埃及肺及胸膜肿瘤患者的血清V》

作者简介

AMEL AA. HASHIM, Department of Biochemistry and Molecular Biology, Faculty of Pharmacy, Helwan University, Cairo, Egypt

《埃及肺及胸膜肿瘤患者的血清V》

书籍目录

FRONT MATTER

Chapter 1: The Human Lung

Chapter 2: Lung and Pleural Cancers

Chapter 3: Clinical Measures for Evaluation of Lung Cancer

Chapter 4: Tissue Polypeptide Antigen

Chapter 5: Neuron-Specific Enolase

Chapter 6: Angiogenesis

Chapter 7: Human Vascular Endothelial Growth Factor

Chapter 8: Hepatocyte Growth Factor

Chapter 9: Subjects and Methods

Chapter 10: Results

Chapter 11: Discussion

BACK MATTER
