《WITHIN OFFICES(办公室设肌

内容概要

Buoyed by shifts in the orfanizational structure of corporations and advances in technology and communication, both office culture and design have dramatically altered in recent years. The way we view our jobs has changed along with the way we do them as work is increasingly being regarded as part of our lifestyle. Within Offices presents some of the most exciting examples of office design to be found in Asia. It showcases over forty offices from around the Asian region, ranging from an office-cafe for freelancers in Tokyo containing a photographer, desks and fax machines, to a communications company's Singapore office containing a cave-like conference room. The workspaces presented here illustrate just how dramatically the design of offices has developed in recent years, as well as indicate the exciting direction that working will take into the future.
