

《美国医师执照考试》

图书基本信息

书名 : 《美国医师执照考试》

13位ISBN编号 : 9787565904813

10位ISBN编号 : 7565904813

出版时间 : 2013-1

出版社 : 北京大学医学出版社

页数 : 308

版权说明 : 本站所提供下载的PDF图书仅提供预览和简介以及在线试读 , 请支持正版图书。

《美国医师执照考试》

内容概要

《美国医师执照考试:High-Yield系统解剖学(第4版)》内容高度概括，重点突出有利于读者快速掌握学科的核心知识。编排新颖、既有基础知识要点的介绍，又有以疾病为核心的综合归纳，并体现了相关学科的横向联系。语言规范、地道，既有利于读者快速掌握专业词汇，又有利于医学英语思维的培养。《美国医师执照考试:High-Yield系统解剖学(第4版)》是参加美国医师执照考试的必备辅导用书，也可作为我国医学院校从事双语教学的教材和参考用书，对教师进行英语授课，学生学习、参加考试具有重要的参考价值。

《美国医师执照考试》

作者简介

作者：（美国）杜德克（Ronald W.Dudek）（美国）路易斯（Thomas M.Louis）

《美国医师执照考试》

书籍目录

Preface 1 Vertebral Column .The Vertebral Column .Curves .Joints .Vasculature of the Vertebral Column .Clinical Considerations .Normal Radiology 2 Spinal Cord and Spinal Nerves .Components of the Spinal Cord .Meninges and Spaces .Arterial Supply of the Spinal Cord .Components of a Spinal Cord .Dermatomes .Clinical Proceclures .Clinical Considerafions 3 Autonomic Nervous System .General Features of the Nervous System .Sympathetic Division of the ANS (Thoracolumbar) .Parasympathetic Division of the ANS (Craniosacral) .Summary Table of Sympathetic and Parasympathetic Motor Actions 4 Lymphatic System .Central Lymphatic Drainage .Summary Diagram of Specific Lymphatic Drainage 5 Chest Wall .General Features of the Thorax .Bones of the Thorax .Muscles of the Thorax .Movement of the Thoracic Wall .Arteries of the Thorax .Veins of the Thorax .Nerves of the Thorax .Breast .Anterior Chest Wall .Lateral Chest Wall .Posterior Chest Wall .Mediastinum .Radiology 6Pleura, Tracheobronchial Tree, and Lungs .Pleura .Tracheobronchial Tree .Lungs .Clinical Considerations .Cross-sectional Anatomy 7 Heart .The Pericardium .Heart Surfaces .Heart Borders .Fibrous Skeleton of the Heart .VaNes and Auscultation Sites .Arterial Supply of the Heart .Venous Drainage of the Heart .The Conduction System .Innervation of the Heart .Gross Anatomy of the Heart .Clinical Considerations .Radiology 8 Abdominal Wall .Abdominal Regions .Clinical Procedure .Inguinal Region .The Scrotum 9 Peritoneal Cavity .Peritoneal Cavity .Omentum .Intraperitoneal and Extraperitoneal Viscera .Clinical Considerations 10 Abdominal Vasculature .Abdominal Aorta .Venous Drainage of the Abdomen .Hepatic Portal System 11 Abdominal Viscera 12 Sigmoid Colon, Rectum, and Anal Canal 13 Spleen 14 Kidney, Ureter, Bladder, and Urethra 15 Suprarenal (Adrenal)Glands 16 Female Reproductive System 17 Male Reproductive System 18 Pelvis 19 Perineum 20 Upper Limb 21 Lower Limb 22 Head 23 Neck 24 Eye 28 Ear Appendix 1: Muscles of the Arm Appendix 2: Muscles of the Leg Credits Index

章节摘录

版权页：插图： b. When a person is supine aspirated material most commonly enters the right lower lobar bronchus and lodges within the superior bronchopulmonary segment (#6) of the right lower lobe. c. When a person is lying on the right side aspirated material most commonly enters the right upper lobar bronchus and lodges within the posterior bronchopulmonary segment (#2) of the right upper lobe. d. When a person is lying on the left side aspirated material most commonly enters the left upper lobar bronchus and lodges within the inferior lingular (#5) bronchopulmonary segment of the left upper lobe. Lungs (Figure 6-3) A. RIGHT LUNG 1. The right lung consists of three lobes (upper, middle, and lower) separated by a horizontal fissure and an oblique fissure. 2. The horizontal fissure runs at the level of costal cartilage 4 and meets the oblique fissure at the midaxillary line. 3. The diaphragmatic surface consists of the middle lobe and lower lobe. B. LEFT LUNG 1. The left lung consists of two lobes (upper and lower) separated by an oblique fissure. 2. The left upper lobe contains the cardiac notch, where the left ventricle and pericardial sac abut the lung. The lingula (which is the embryologic counterpart to the right middle lobe) lies just beneath the cardiac notch. 3. The diaphragmatic surface consists of the lower lobe. C. BRONCHOPULMONARY SEGMENT 1. The bronchopulmonary segment contains a segmental bronchus, a branch of the pulmonary artery, and a branch of the bronchial artery, which run together through the central part of the segment. 2. The tributaries of the pulmonary vein are found at the periphery between two adjacent bronchopulmonary segments. These veins form surgical landmarks during segmental resection of the lung. 3. The bronchopulmonary segments are both named and numbered as follows: a. Right Lung . Upper lobe: apical (#1), posterior (#2),* anterior (#3) . Middle lobe: lateral (#4), medial (#5) . Lower lobe: superior (#6), medial basal (#7), anterior basal (#8), lateral basal (#9), posterior basal (#10) b. Left Lung . Upper lobe: apical (#1), posterior (#2), anterior (#3), superior lingular (#4), inferior lingular (#5) . Lower lobe: superior (#6), anterior basal (#8), lateral basal (#9), posterior basal (#10); note that #7 is absent. D. BREATH SOUNDS 1. Breath sounds from the upper lobe of each lung can be auscultated on the anteriorsuperior aspect of the thorax. 2. Breath sounds from the lower lobe of each lung can be auscultated on the posteriorinferior aspect of the back. 3. Breath sounds from the middle lobe of the right lung can be auscultated on the anterior thorax near the sternum just inferior to intercostal space #4.
