章节摘录

Your Dream-fulfillment Aid Part of youth lies in dreaming——dreaming impossible dreams that you can sometimes make possible. Robert F. Kennedy said this , "Some men see things as they are and say Why ? I dream things that never were and say Why not ? " Certain books push the boundaries of the human mind out beyond belief. After all , a little bit of greatness hides in everyone. Let books bring it into full bloom.

Your Know-thyself Aid Whats your most important quest ? Finding yourself. Finding your own identity. The Greeks epitomized that problem in two words. Know thyself. Well , articles and books hell5 in that all-important search. They supply assurance of the power and worth of your own life , a measure of your possibilities. To see yourself in proper perspective , you need detailed picture of real people in real situations. We need to see three-dimensional characters , with all the typical human fears and limitations. Then , and only then , can you begin to see and know yourself as you should.

Your Vocational Counselor and Consultant What about practical questions , such as those about your vocation ? Will reading help you decide more intelligently what to do , how to prepare yourself and how to succeed on the job ? To answer the first question , you have to know your own talents , abilities , and interests well. You must also , however , know the opportunities in the world around you. Some Bureau of Labor Statistics , for example , predicted a surplus of approximately two million school teachers. Still another source indicated that right now "the health fields are the only fields in which we have shortages." Baance such information with self-knowledge and you have some of the ingredients needed to make intelligent , perceptive choices.
