内容概要

An exploration of digital innovation. It presents: the results of an empirical analysis of the new phenomenon of virtual clusters (VCs), which highlight the dynamics of these emerging innovation networks in the digital economy - and the challenges that this dynamics represents for the conventional theories, which are unable to define a comprehensive framework that supports the development of these networks; an overview of the most significant theoretical approaches to innovation networks, and their rethinking in the digital economy scenario - following a neo-Schumpeterian approach, a particular focus is on the opportunity to integrate the economic benefits coming from the geographical proximity, with the advantages related to the "organizational proximity" allowed by the ICT networks; the constituent points of a strategy aimed at sustaining the developing processes of a VC in a drawback region, and a description of the e-Salento project, an application of this strategy to an Italian drawback region, the Salento - some general implications of the project for theory and practice are also discussed; and the architecture and the master plan of two initiatives within the e-Salento proje The perspective advanced in this work addresses issues concerned with VC growth and regions' economic development processes that are common to both the regional studies and the innovation management literature; the text represents an important empirically grounded contribution to them. Furthermore, several scholars argue that new development models are emerging for firms and regions. There is a lack of published work that provides empirical grounding and/or analytical models of firms' and regions' development processes in the Net Economy.

书籍目录

Introduction to Digital Innovation Aldo Romano
Chapter I Industrial Clusters in the Net-Economy: Empirical Evidence and Some Theoretical Approaches 1.1. Introduction 1.2. Some Seminal and Consolidated Approaches to the Analysis of Industrial Clusters 1.3. Emerging Virtual Industrial Clusters: Some Empirical Evidence 1.4. VCs as New Patterns of Economic Activity: Towards the Virtual Innovation System 1.5. Conclusions
Chapter 2 A Strategy to Sustain the Development Processes of a "Smart Community" in the Digital Economy 2.1. Introduction 2.2. A New Techno-Economic Paradigm: The Digital Economy 2.3. The Conceptual Framework for Setting Up a Smart Community 2.4. The "Smart Community" Model 2.5. Conclusions
Chapter 3 A Knowledge Hub for Regional Development 3.1. Introduction 3.2. Leadership in Regional Innovation 3.3. The Cycle of Regional Innovation Leadership (RIL) 3.4. An Outline of the Values Proposed for the Regional Development-Oriented Knowledge Hub (KH) Initiative 3.5. The Regional Development-Oriented Knowledge Hub: Main Functions 3.6. Conclusions
Chapter 4 Net Economy Business Models for SMEs Operating in Fragmented Markets 4.1 Introduction 4.2 The "Open Markets" Model For European SMEs 4.3 A Federated-Distributed Model for the Tourism Sector
Chapter 5 Knowledge Leadership to Drive Digital Innovation 5.1 Introduction 5.2 The Emerging Competitive Environment of the Digital Economy 5.3 Re-thinking the Conventional Theories 5.4 Digital Innovation Calls for Knowledge Leadership 5.5 Digital Innovation Processes Driven by Knowledge Leadership
