《公共外交与跨文化交流》

内容概要

《公共外交与跨文化交流(英文版)》内容简介：It is through his engaging in public diplomacy that Mr. Zhao Qizheng comes to recognize its significance for China. This has prompted him to summarize his practices in and reflections on public diplomacy over the past 20 years. It is also a record of China's integration into the world and the world's growing understanding of China. In this book, the vision of international communication is broadened as an important element of public diplomacy, and the bar in international communication is raised to better introduce China to the outside world.

More than just a collection of documents, or a minute detailed account, it is enlightening for both academic thinking and real-life operation.

章节摘录

版权页： 插图： Chapter 1 China in an Age of Public Diplomacy In the 60-plus years since the birth of New China in 1949, the last three decades in particular, China's national strength has grown constantly and its role on the world stage has become ever more important. In this process, brilliant achievements in diplomacy have been achieved, of which the whole nation feels proud. Yet China still faces new tasks and challenges. Now, for the sake of its development and influence in the world, it is a necessary step for China to strengthen public diplomacy, in both domestic and foreign contexts. The entities participating in public diplomacy express, from various angles, China's national conditions, explain its policies and showcase its culture. The essence of these activities is to achieve understanding and support for China from the international community through the communication and exchange of information. . From Non-governmental Diplomacy to Public Diplomacy Public diplomacy encompasses "non-governmental diplomacy," a term with which we are more familiar. But it has connotations richer than non-governmental diplomacy. The shift from non-governmental diplomacy to public diplomacy has been made necessary by the context of the current age and changes in the international environment. It is also the result of the gradual maturing of a country's ability in cross-cultural communication.
